## **The elemental logics.**

Yoshkar-Ola, 3-nd edition: **MarPIK, 2004. - 272 p.**

Experiment of synthesis of traditional classical and modern mathematical logics is undertaken this course.

The new ideas:

- The necesitas interpretation of logical forms and its rightness, truth-lie, affirmation-negation (pp.13-19, 116-118, 141-143).
- The relative absoluteness of truth (pp. 19-20, 36, 42, 159-161).
- The figurative conception of contents (concept) and denotation of notion (pp.38-41, 49-56, 104).
- The conceptive classification of definitions (pp. 57, 69-73).
- The qualitative formulas of the judgements (pp. 104-105, 126).
- The grounding of the incontroverce of qualitative induction, its relative absoluteness (pp. 155, 159-161, 219).
- The stricture of the rules of natural conclusion (pp.202-207).
- The proof of the logical laws (pp.209, 212-215, 231-243) and its unity (pp.233-245).

More you can look in Russian version: [Элементарная логика](#).
